Advantages of Custom Promotional Power Banks

Portable

- Convenient to carry
- High portability
- Feather-light weight and unique design
- Useful for Traveler

Attractive in looks

- Power banks are very catchy and attractive in looks.
- They are pencil-thin in looks
- Being so splendid in looks,
- it is always a delight for anyone to buy it
- keep it for emergency purposes.

Multiple sockets

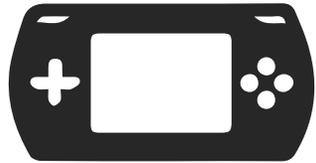

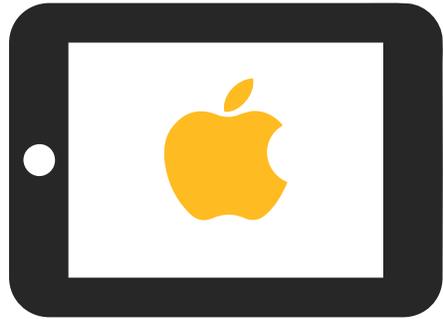

The modern day power bank supplier realizes the need of the 21st century man. Usually, we are equipped by more than one gadget.

if you are traveling with your family, then each member may be having his or her cell phone. So, is it possible to charge all of them at once? Yes, it is highly possible thanks to the innovative 6-socket feature which comes with these gadgets.

Can charge other devices as well

Apart from cell phones, you can also get other electronic devices recharged. PSP, iPad, iPod and iPhone can also be recharged.

Low cost

- One more benefit is that the power bank is a very affordable tool.
- It doesn't require any high investment on your part.
- Plus, you get good discounts if you purchase from a top-notch Power bank supplier.

Charge when your phone runs out of steam

- When your phone runs out of steam and you are not near any electric socket,
- The only way you can get it charged is through a power bank.
- if you are commuting or are traveling, then this device can be a boon.

The 5 Most Popular Reasons to Own a Power Bank

As an Extension of Your Fashion
Just like your phone case, special edition chargers or colorful power banks work as a fashion accessory.

Charge [Almost] Everything
Every from Nintendo switches, drones, printers, fans, and more can power up.

Take them absolutely anywhere
Portable, compact, and built-in protections, power banks are suited no matter where you take them.

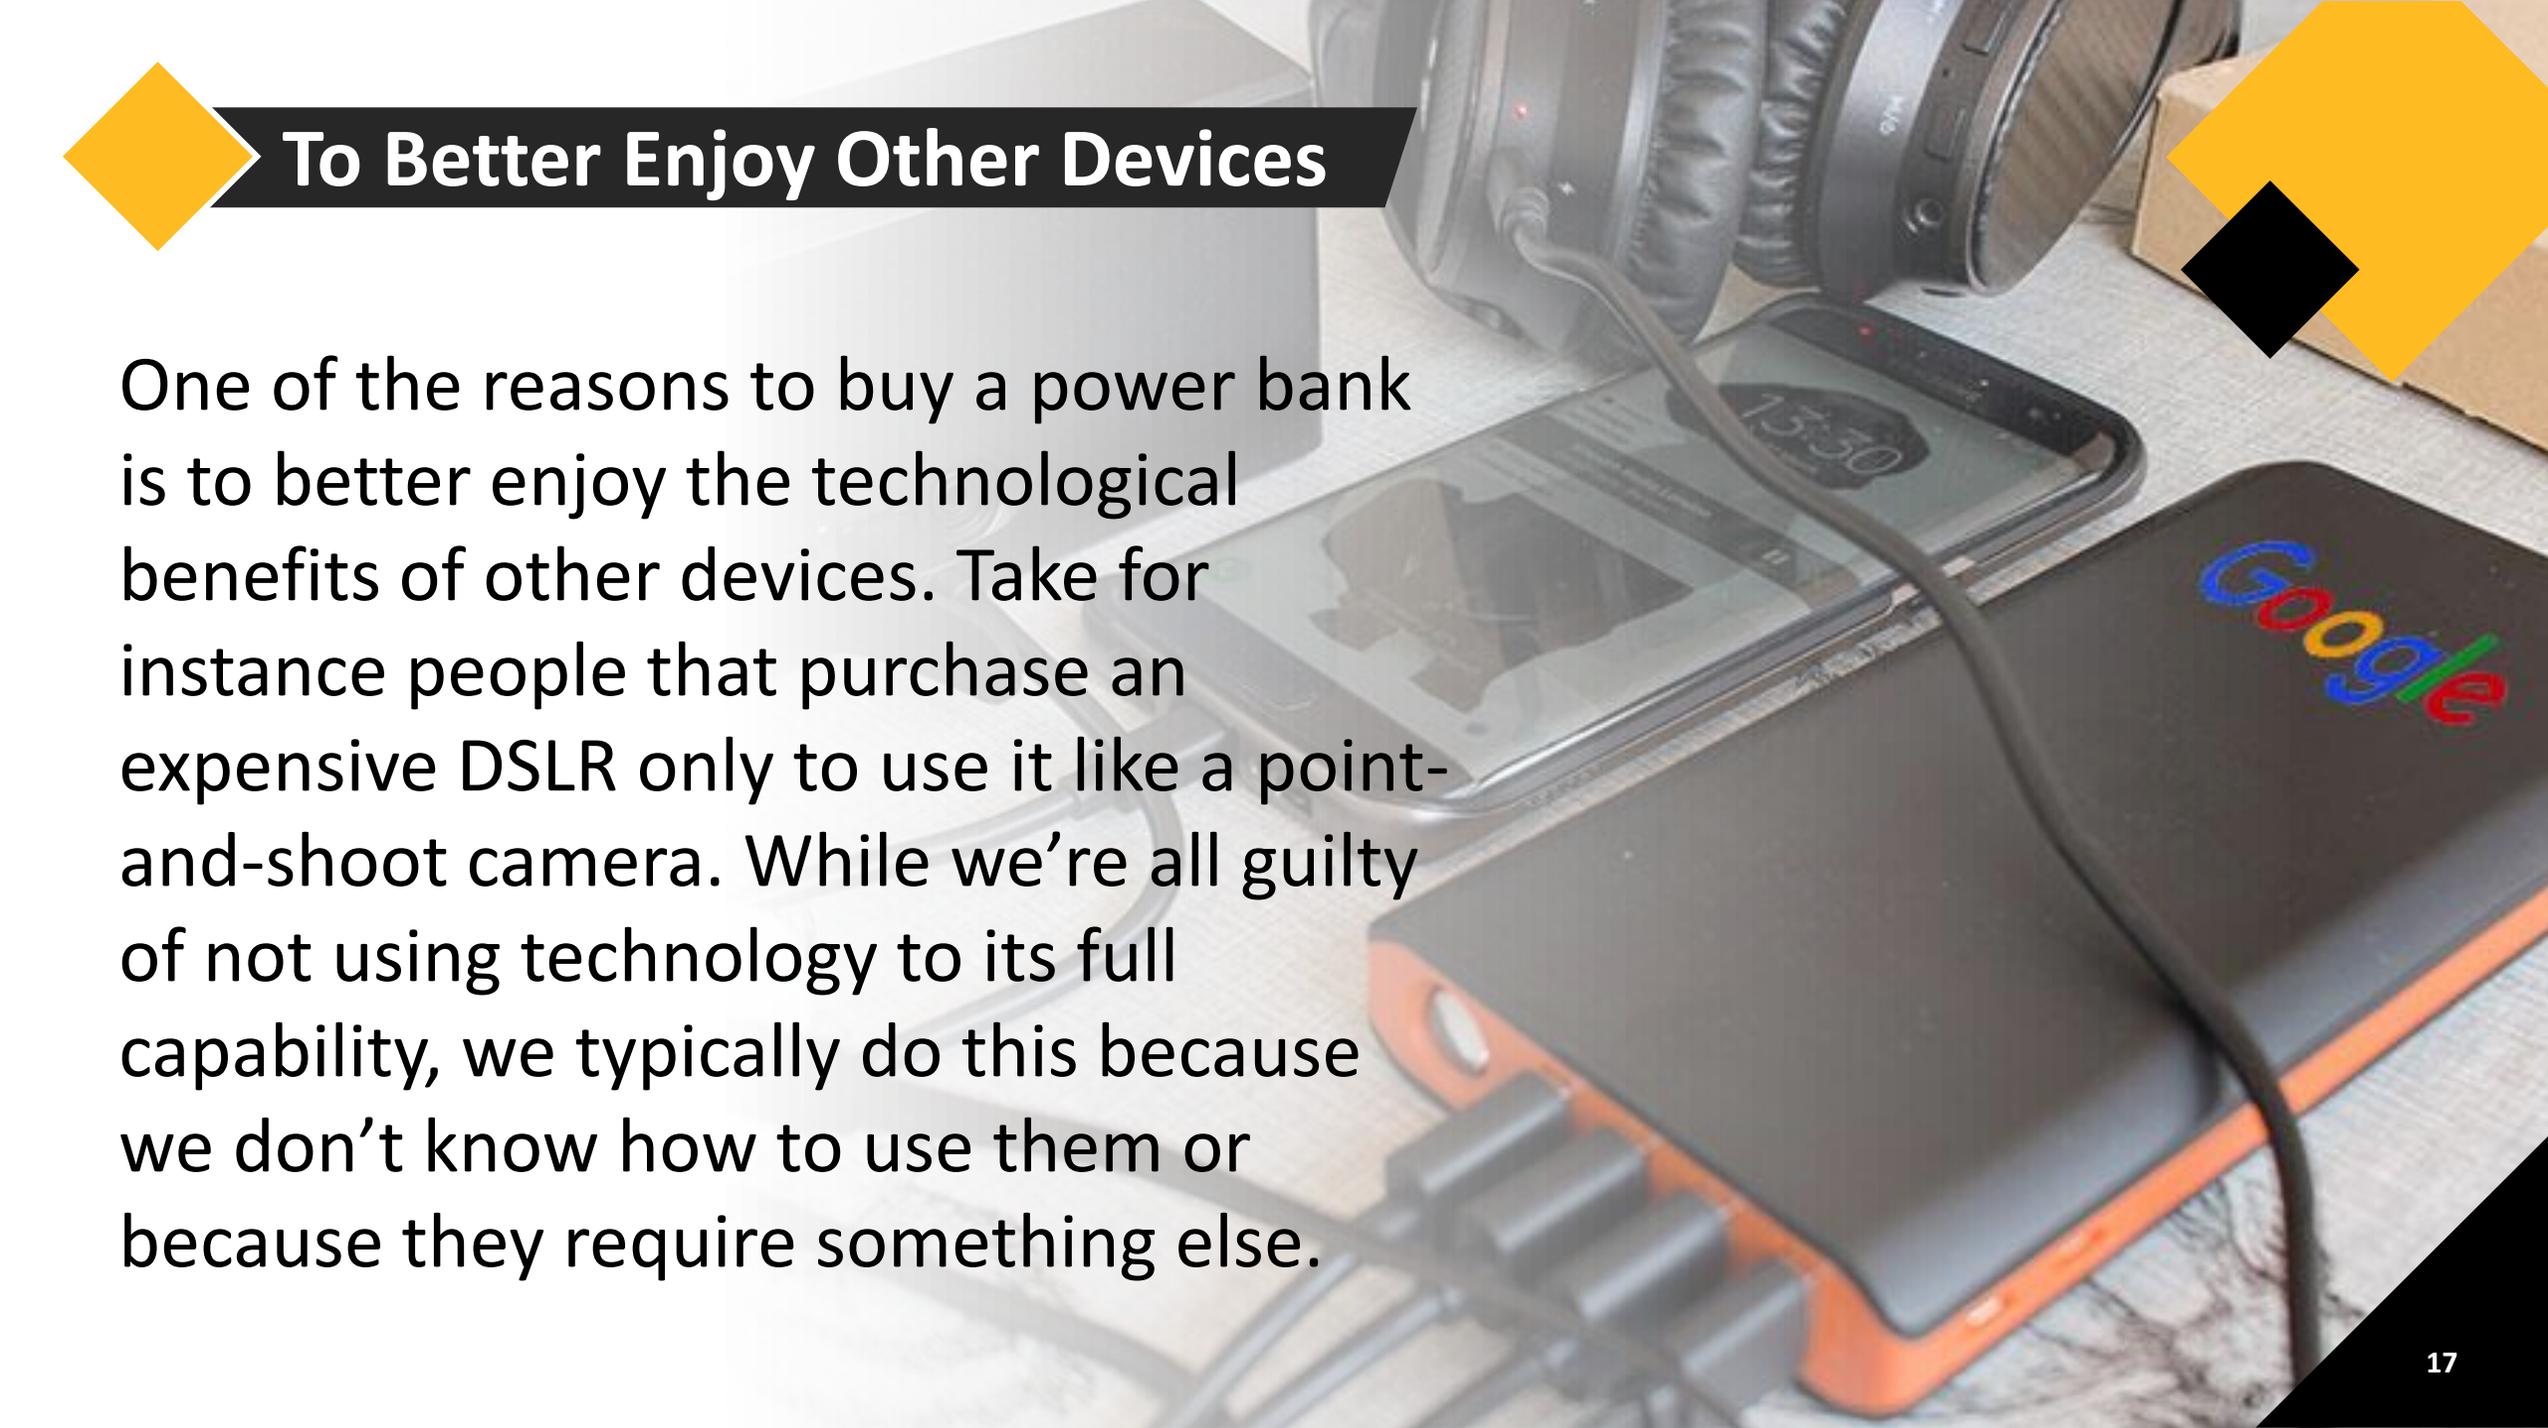

As an Extension of Your Fashion

While power banks serve a different function to phone cases, there is a growing scene as they become a fashion accessory in their own right.

Typically found in the standard black casing, there are numerous color alternatives to choose from that can match with your phone and case.

To Better Enjoy Other Devices

One of the reasons to buy a power bank is to better enjoy the technological benefits of other devices. Take for instance people that purchase an expensive DSLR only to use it like a point-and-shoot camera. While we're all guilty of not using technology to its full capability, we typically do this because we don't know how to use them or because they require something else.

To Better Enjoy Other Devices

You may use the new 12-inch MacBook, which has a USB Type-C port to charge. Ordinarily you need to charge this from home. However, with a power bank with USB Type-C capability, you can now enjoy extended power wherever you go.

To Better Enjoy Other Devices

Another example are phones with Qualcomm Quick Charge technology. If you have a compatible phone, a power bank enables you to make use of the fast charging capabilities of Qualcomm without being tied to a power plug to charge.

Charge [Almost] Everything

You can charge or power almost everything, including devices as diverse as

- Laptops
- Fans
- Lamps
- Printers
- Drones
- Vacuums
- Humidifiers
- String Lights
- Portable Massagers
- Cameras
- Go Pros.
- Nintendo Switch

It should be noted that for many of these devices, a standard power bank would not work. You need a special power bank with an AC output.

Many appliances can connect, however if their required wattage is above what the power bank can supply, it won't work. Therefore, it's important to check beforehand if your device or appliance is compatible.

Share It

A power bank isn't just about charging your own device. With 2 or even 3 ports available, you can share the load. While this is a convenience, the best part of keeping one with you is that it is an excuse to speak to people and even make new friends.

Take Them Absolutely Anywhere

Power banks are light, affordable, and most importantly, portable! In fact so portable, that people started to bring them everywhere. From flying with power banks, to heading out alone on hikes, these little chargers are wherever you look. It was partly because of their flexibility that manufacturers responded by including a number of safety protections to ensure they can be used no matter the environment.

**Why they
are so popular
now, and why they
make for awesome
promo products**
