## GET TO KNOW YOUR MACHINE

Voltage: 110V-240V

Power: 29W

Frequency: 110V – 60Hz; 220V – 50Hz

## USING YOUR HAIR STRAIGHTENER BRUSH

- For best results, wash your hair with a shampoo and conditioner before using the device. Make sure that your hair are dry and not wrapped around each other.
- Press the Power button for 3 seconds to turn it on. Press it again for 3 seconds when you want to turn it off.
- Press "+" and "-" at the same time to convert Celsius degrees to Fahrenheit degrees and vice versa.
- Use "+" and "-" buttons to select your straightening temperature:
  - ▶ 365°F (180°C) recommended for fine and delicate hair
  - ▶ 410°F (210°C) recommended for natural textured hair
  - ▶ 450°F (235°C) recommended for thick, wavy or curly hair

## INSTRUCTIONS & TIPS

- 1 Please keep your hair dry and neatly groomed before using the device.
- 2 Insert the plug into a proper socket.
- 3 Turn it on and adjust the temperature that suits your hair.
- 4 Use one hand to pull hair end and the other to comb hair with the straightener brush.
- 5 If you want to keep your hair straight longer, please use a proper lotion such as a softener lotion or argan oil and wash your hair before straightening.
- 6 The straightener brush should not clip too much hair. If it does so, you should slow down the process of straightening.
- 7 The device will be turned off automatically in an hour due to the built in safety system. You can also use the Power button to turn the device on and off.

## SAFETY WARNINGS

- Read the manual before using the device.
- Keep the device away from water. Do not use it in wet places and while you're having a bath.
- Supervision is required when the device is used by a child or a handicapped person. Do not let a child play with it. This is not a toy.
- If the cable or the plug are damaged, not working properly or dropped into water, never use them.
- Keep the device and cable away from wet, moist and hot surfaces.
- Do not dismantle the product.
- Don't touch the hot head of the brush with your fingers after heating it up.

## MAINTENANCE & CLEANING

The product needs to be cleaned regularly due to hair residue. If your device needs cleaning, unplug the unit and use a cloth with a small amount of detergent to clean it.

## FAQ

- Q** Does this device damage your hair?
- A** No, it doesn't. It's just like a flat iron just in brush form. It's very convenient and easy to use.
- Q** Should I wash and detangle my hair before using the device?
- A** For the best results we recommend washing and detangling your hair before using the device. Remember to fully dry your hair after washing them!
- Q** How long does it approximately take to straighten my hair?
- A** It takes about 5-10 minutes (should not take more than 15 minutes). It depends on the density of your hair.
- Q** I have thick and curly hair. What should I do to keep them straight for a longer time?
- A** Try using a proper lotion such as a softener lotion or argan oil and wash your hair before straightening your hair with the device. Remember to fully dry your hair after washing them!

## FAQ

- Q** Is it dual-voltage? Will it work on a 220V or 110V?
- A** Yes. When you want to take the device with you to other countries, make sure that it will work there by checking the voltage, power and frequency details. You might also need to acquire a plug adapter.
